LET'S BUILD SOMETHING

Empower Your Creative Side

It can feel like a bad “case of the Mondays” all week, every week if the work environment just doesn’t work for employees. We have all experienced days that feel like we are pulled in different directions and can’t focus to get anything done. From cramped desks, to awkwardly positioned desk heights, the work environment can deeply impact everything from employee happiness to productivity and, ultimately, the bottom line.

ERGONOMIC

To combat the negative effects of an uncomfortable work environment – a cause of many work Related Musculoskeletal Disorders (WMSDs) - create custom workstations using the trusted brand of aluminum extrusion we have used successfully in hundreds of builds – Maytec. Cost to companies for these issues are steep; between \$45 and \$50 billion annually in compensation, lost wages and decreased productivity

WHY MAYTEC?

- Ergonomic
- Custom Solutions
- Modular
- Simple to use
- Great Lead Times
- Economical

MODULAR

We recognize that the configuration you have right now might not always fit your long term growth. Our aluminum extrusion is easily modifiable to fit your future needs. Our extrusion solutions are easily assembled, disassembled and relocated. The casters give the freedom to move the tables according to work flow. In a company that is constantly evolving and growing, a setup that worked one month, might not work the next. The Maytec workstations can move, adapt, and grow with you.

SIMPLE + CUSTOM

We understand that not every need is satisfied by an off-the-shelf solution, so we provide a custom service, designing and producing profile systems created to your exact requirements.
